

WSS -1 4 0 Reactive Silicone

Product technical specification

WSS -140 is reaction type silicone for coating leather manufacture, has excellent reactivity, excellent transparency, excellent softening effect and ventilation effect. Has an extra smooth feel.

- Excellent reactivity
- Excellent compatibility (very low possibility of causing turbidity)
- No solvent
- Soft and breathable effect
- With extra smooth feel

Recommended Applications

Two-component system for polyurethane/acrylic resin/isocyanate and polyester/isocyanate

Adding amount

As supplied calculated on total formulation: 2.0-20.0%

Technical data

Appearance:
transparent liquid
Active matter
content: 100%

Process Description

Pre-diluted or directly added to the paint in the form of supply, and can be pre-diluted with the recommended solvent to facilitate adding and mixing

chemical composition

Organosiloxane
copolymer

package

25KG, plastic bucket
200KG, iron drum

Storage stability

Store in unopened original packaging and use within 12 months from the date of production .
